EQUITY AND IMPLEMENTATION

EQUITY IS AN ISSUE AT THE FOREFRONT IN EDUCATION, AND IN SOCIETY. HOW DO WE ADDRESS EQUITY AND PRODUCE REAL AND LASTING CHANGE ?

Welcome

Why Does a Focus on Equity Matter?

Already hit hard by pandemic, Black and Hispanic communities suffer the blows of an unforgiving winter storm

Texans of color, disproportionately devastated by death and unemployment during the last year, tend to live in neighborhoods with older homes, more vulnerable pipes and fewer food options. That's made it harder to withstand the cold temperatures and power outages.

What scares you about equity work?

How do we actually make it deep

Our Framework

What is Equity Minded Competence?

EQUITY-MINDED COMPETENCE
Aware of their racial identity
Uses quantitative and qualitative data to identify racialized patterns of practice and outcomes
Reflects on racial consequences of taken-for-granted practices
Exercises agency to produce racial equity
Views the campus as a racialized space and actively self-monitors interactions with racially minoritized students

LACK OF EQUITY-MINDED COMPETENCE
Claims to not see race
Does not see value in using data disaggregated by race/ethnicity to better understand the experience of racially minoritized students
Resists noticing racialized consequences or rationalizes them as being something else
Does not view racial equity as a personal responsibility
Views the classroom as a utilitarian physical space

Racial Equity Action Planning- Part 1

- 2.What data is needed?
- 3.What questions does the data make us ask?
- 4.How can we get more information? Interviews ?

Racial Equity Action Planning Framework- Part 1	Action Team		
Key Questions or Problems top address			
Data Gathering- what data needs to be gathered?			
What does the data seem to say? What questions does the data make us ask?			
Engagement- how do we engage others to get more information? Who do we need to talk to? Why? What questions do we need new perspectives on?			

Racial Equity Action Planning- Part 2

1. Potential Strategies
2. How can the strategy be designed to change outcomes?
3. What would the implementation cycle design look like to ensure success
4. How might we monitor, assess and evaluate our changes?

Potential Strategies- What potential strategies emerge from the data and research?			
Strategy Design- How can the strategy be designed to change outcomes?			
Implementation Cycle- Design of complete implementation cycle			
Monitoring, assessment and evaluation- how will changes be monitored and evaluated for success

**Schools....
where good ideas go
to....die?**

Implementation for IMPACT requires that we be inclusive of a broad range of stakeholders as we lead teams, develop professional learning, establish monitoring systems, and work to implement with fidelity. Success is actually in the implementation.

Inclusion

Implementation team members create inclusive spaces that seek out the perspectives and contributions of all stakeholders. Inclusive implementation incorporates the needs, assets, and perspectives of their staff and community to create equity and a sense of belonging, respect, and value.

Meaningful Leadership

Implementation team members plan and develop organizational leadership expertise and systems designed to facilitate change during all stages of implementation; ensuring all stakeholders routinely engage in ongoing learning and improvement processes.

Professional Learning

Implementation team members design and plan professional learning structures that ensure implementers engage in iterative processes focused on building capacity and scaling the innovation implementation.

Assess & Adjust

Implementation team members design monitoring plans that measure the innovation implementation. They develop structures and processes that allow teams to use an improvement cycle to guide real-time planning and decision making.

Collective Efficacy

Implementation team members set the conditions that foster and support the development of collective efficacy throughout the organization.

Teams

Implementation team members build, lead, and facilitate vertical and horizontal teams that collaboratively monitor, support, and adjust innovation and implementation efforts.

Implementation Stages

Racial Equity Action Teams	Rationale or data to support recommendation	Implementation Design	Implementation Design
Strategy Recommendation		Who needs to be on the team?	How will the implementation be monitored? What measurable targets, goals to see that it is working?
Zone level application		Who else needs to be involved?	How will feedback and coaching be provided?

Racial Equity Action Teams	Rationale or data to support recommendation	Implementation Design	Implementation Design
Campus level application		What PD needs to be developed? (Teach, model, practice, reinforce)	How will implementation teams spread the great practices vertically and horizontally?
Community level application		What systems of communication and expectation setting need to be created?	How will accomplishments be celebrated and next steps taken?

Let's reflect!
